

NEW QUEST REQUIREMENTS

When you count this card's points, if you wish to score these points, you must immediately choose and destroy one of your Sanctuaries.

Works the same way, but you must destroy two Sanctuaries to activate this scoring.

The destroyed Sanctuaries are removed from the game and are not taken into account for further scoring.

You must have 4 or more yellow cards to score the corresponding points when scoring this card.

You must have 5 or more Clues to score the corresponding points when scoring this card.

You must have 5 or more nighttime cards to score the corresponding points when scoring this card.

In this expansion, you will find Region cards with a grey Biome, the *Mystical Havens* . This is a fifth color, distinct from the rest.

These Mystical Havens can already be found on some Sanctuaries from the base game, and they are also featured in *Faraway - People from Below*, the first expansion of the game, which allows to bring the player count to 7.

UNDER STARRY SKIES

The shooting star season starts in Alula, and, with it, the meteor showers. This festive period attracts a throng of colorful visitors and eager pilgrims.

According to the elders' tales, the meteors are responsible for Alula's shifting earth. They influence the continent's laws in quite strange ways...

COMPONENTS AND SETUP

15 **METEOR** Region cards, to be shuffled into the Region cards before setting up the game.

These cards have no special ability during the game; however, they behave a bit differently at the end of the game.

This icon denotes the components from this expansion.

38 EXPLORATION DURATION

The **METEOR** Region cards share their exploration duration with some cards from the base game.

When 2 Region cards in play share the same exploration duration, treat **the Meteor Region card's as being higher** than that of the other Region card.

● So:

When you play a METEOR Region card with an Exploration duration identical to your previous card, you find a Sanctuary during phase 2.

If you had played the METEOR Region card before the other card, you would not have obtained a Sanctuary.

● Likewise:

If two players play 2 cards with the same exploration duration in the same turn, the one who played the METEOR Region card **will take their 3 phase after their opponent.**

SCORING

The special ability of Meteor Region cards activates at the end of the game, just before scoring:

Do not flip your METEOR Region cards face down!

They will be visible from the very start of scoring.

Furthermore, check if you have **Region cards in your tableau with an exploration duration ending with the same number (same unit) as one of your Meteor Region cards (pink).**

The Meteors also influence these cards, which also stay **visible from the very start of scoring!**

The Region cards that stay face up are taken into account when scoring points from other cards, **as if they had been played after them.**

However, they keep their position in your tableau. **Their quest will be scored when their turn comes**, as you would score any other Region card.
