

GOLEM

Seals & Deals

*This expansion includes two modules that can be played separately or combined.
Apply all the rules from the base game with the following additions. Refer to the Appendices
at the end of these rules for the explanation of all the new icons introduced in this expansion.*

SEALS COMPONENTS

1 board extension

21 Mission cards (divided by color: yellow, red and blue, 7 cards for each color)

9 Mechanism tokens

3 neutral Golems

10 Gold pieces

For each player

1 Mission board

6 Mission cubes
of the player's color

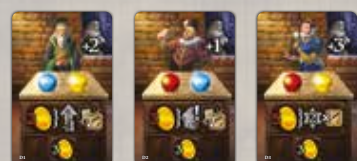

DEALS COMPONENTS

45 Deal cards (divided into 3 levels: I-II-III, 15 cards for each level)

40 Debt tokens

3 Character cards
(two level I-III and one level IV)

12 Book cards

4 Summary tiles

18 Neighborhood tiles
(6 for each color)

Seals Module

SETUP

Set up the game as in the base game, with the following additions.

1. Place the 9 **Mechanism tokens** on the three streets where Students move.
On each street, place one token under columns III, V and VII.
2. Place the **board extension** below the main board.
3. Shuffle all 3 **Mission decks** separately and place them face down next to the board.
4. Place 1 **neutral Golem** on the leftmost block of each district.
5. Each player receives a **Mission board**, which they place next to their player board, and places the 6 **cubes** of their own color on the designated spaces.
6. Place the 10 **additional Gold pieces** in the common supply.

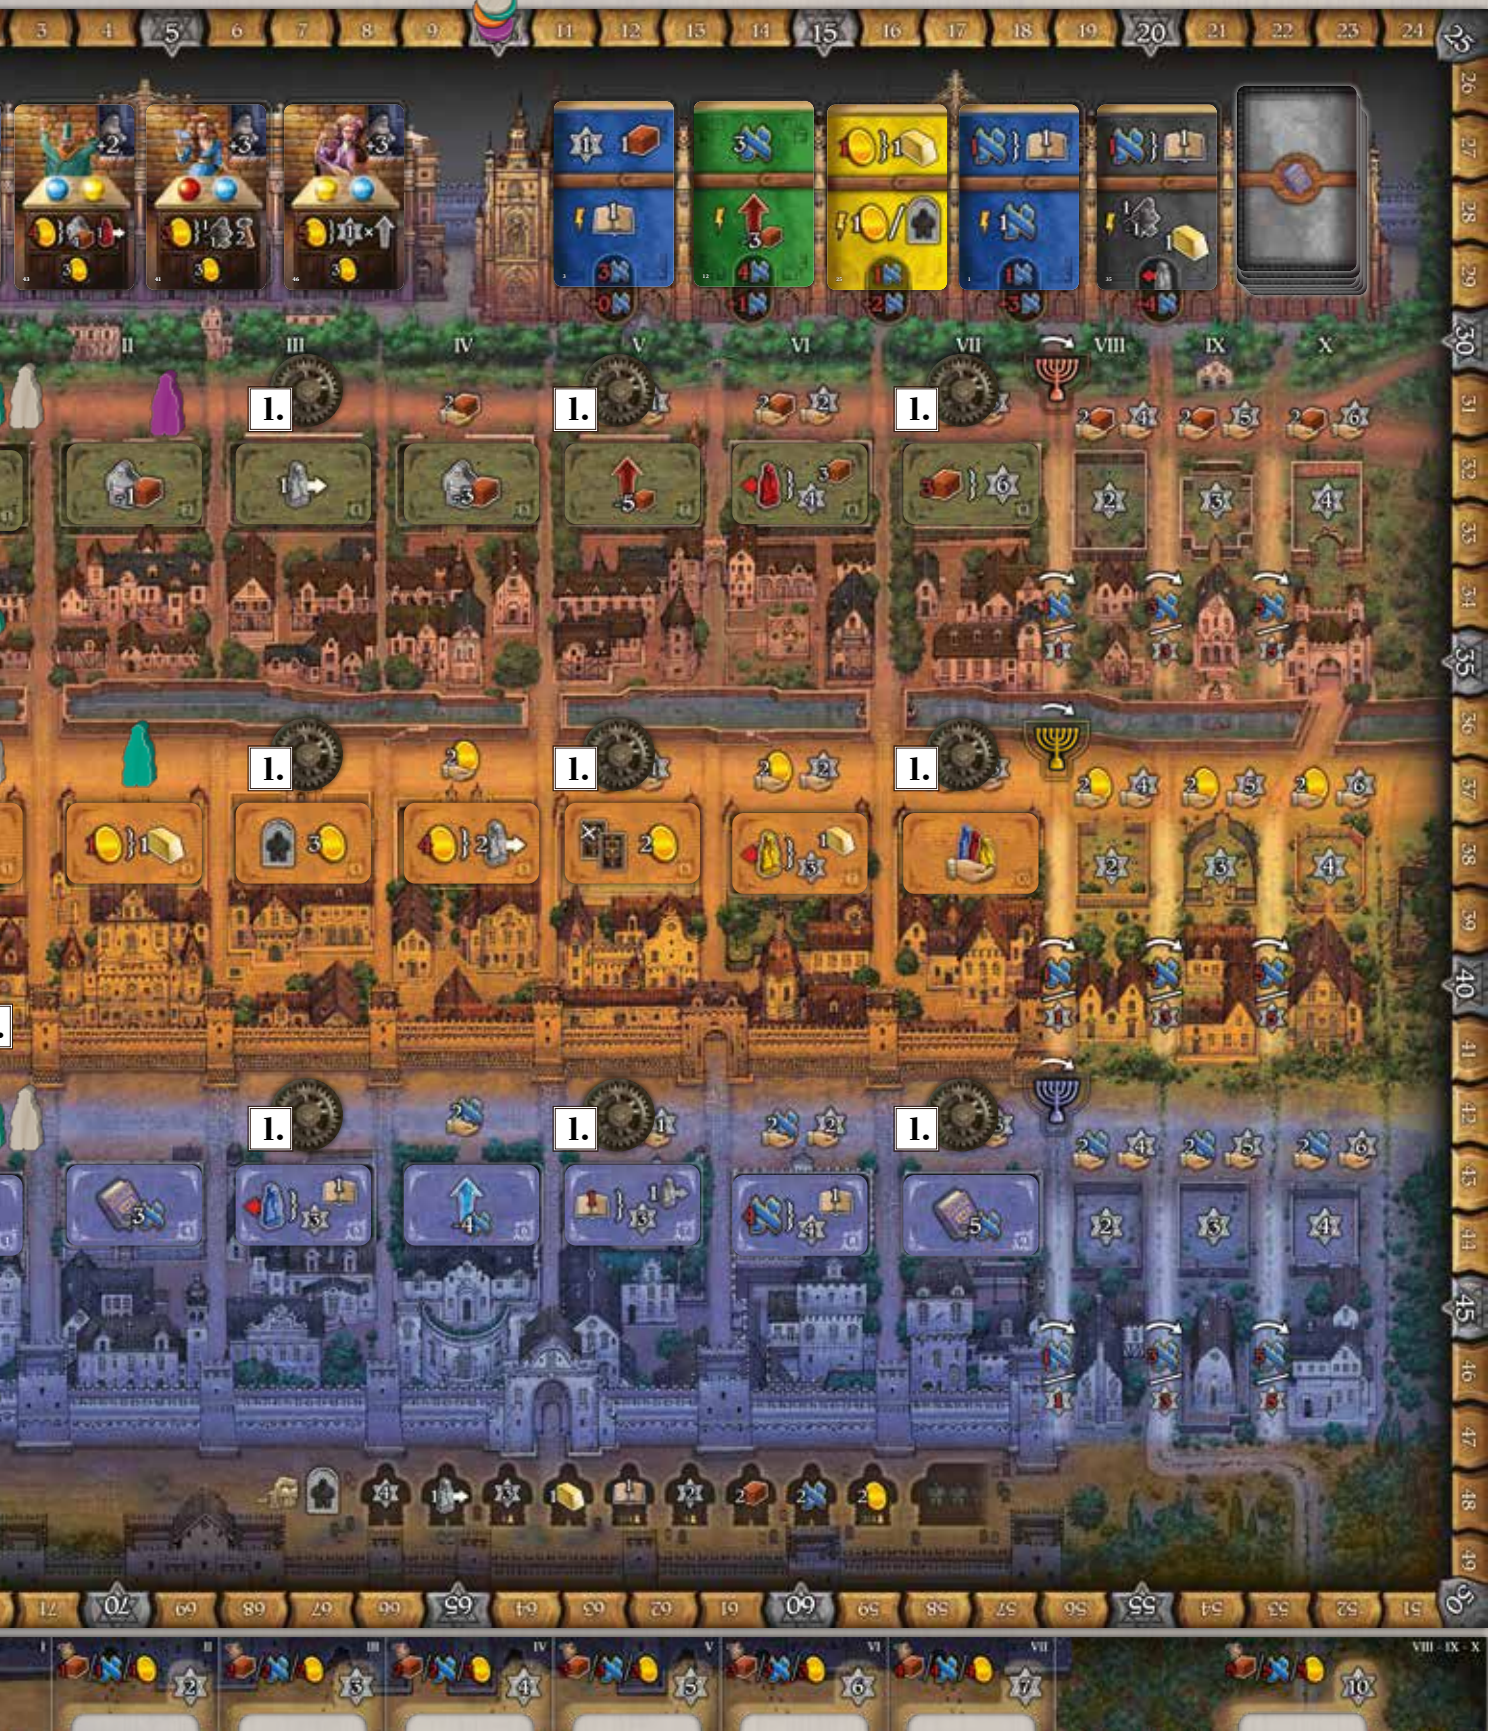

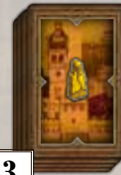

6.

3.

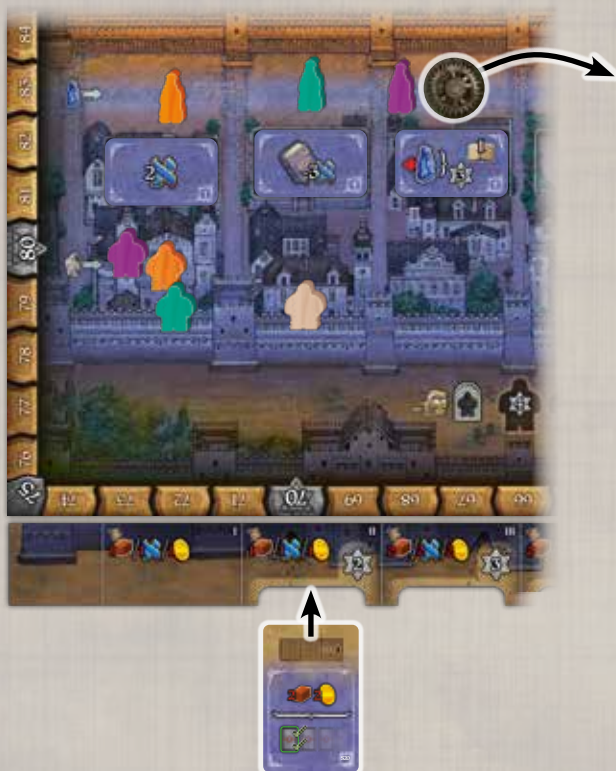

GAMEPLAY

Play the game following the base game rules, with the following additions.

Revealing a Mission

When one of your Students reaches a space containing a Mechanism token before any other player's Student:

1. **Take the Mechanism token** and place it on your Mission board (it will earn you 2 Victory Points at the end of the game).
2. **Draw a Mission card** from the deck of the **same color** as that Student's district (e.g. red district → red Mission) and place it on the **leftmost** available space of the board extension. If all the spaces for Mission cards on the board extension have already been filled, take the Mechanism token without drawing any Mission card.

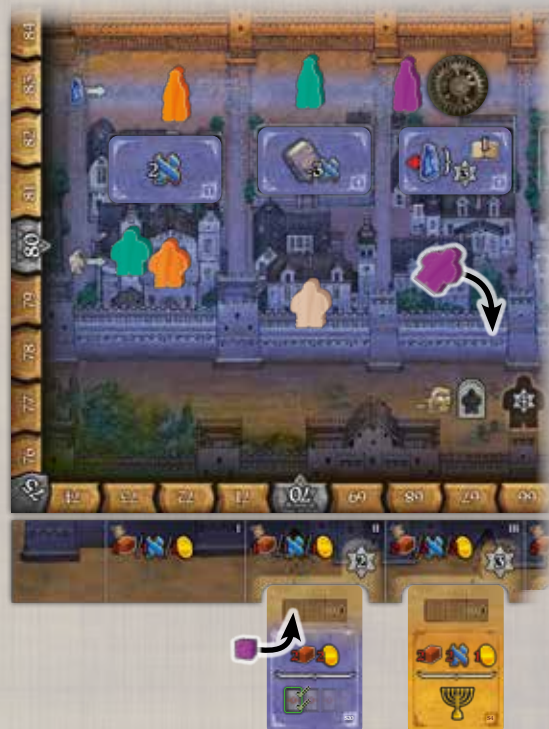

Example: Jade (purple) moves her Student along the blue district street, reaches a Mechanism token, and takes it. She then draws a blue Mission card and places it on the leftmost available space on the board extension.

Joining a Mission

You can join a Mission by activating Golems, **instead of** activating the effect of a Neighborhood tile, with a few differences:

- To activate a Neighborhood tile, the Golem must be located in the exact same block. To join a Mission, however, the Golem can be located in the same column or in any column ahead of that Mission; it is also possible to join a Mission located behind the Golem and of a different color than the district where the Golem is.
- Each Mission has a **cost** (resources or Gold pieces, or it may require you to move a specific Student or a Student of your choice one step backward, or it may require you to move your marker down the Study track, or it may require you to kill a Golem).

Once you have paid the cost, **gain the effect** indicated on the Mission card and **place a cube** of your choice from your Mission board on the leftmost empty space of the Mission card. Some spaces on the Mission cards can only be filled in games with 3/4 players or 4 players.

Example: Jade (purple) activates her Golem in the third column and can therefore complete the Mission in the same column (or in a previous one). She decides to complete the blue one. She spends 2 Clay and 2 Coins to obtain the indicated effect. She then places one of her cubes on the Mission card.

You can place more than one cube on a single Mission, meaning that you can join the same Mission multiple times.

When you remove the second cube from a **space on your Mission board**, you immediately get the corresponding bonus (e.g., move a Student of your choice 1 step forward, upgrade a Development of your choice paying its costs, or get 2 resources of your choice).

Example: Jade (purple) joins a Mission and places one cube on it, emptying one space on her Mission board, which immediately allows her to move one Student of her choice 1 step forward.

Gold pieces

Whenever you earn Gold pieces, you must decide whether to place them on the Artifacts (as usual) **or** on your Mission board.

Any Gold pieces required as payment for Missions must be spent from the Mission board (and not from the Artifacts). It is never possible to move Gold pieces between the Mission board and the Artifact tile.

Completed Missions and Victory Points

When all spaces on a Mission card (the number of which varies depending on the number of players) are filled with cubes, the Mission is complete.

Each player who has placed at least one cube on that Mission card **immediately** scores the Victory Points indicated on the board extension, above the completed Mission space.

Mission cards remain in play until the end of the game, even if they have been completed.

Example: In a 3-player game, Jade (purple) joins this Mission for the second time, filling its last available space (the one marked with the 4-player icon is only available in 4-player games). Jade and Marcus (Green) immediately earn 4 VP.

Neutral Golems

During the Golem Movement phase, all three neutral Golems **move** forward, each in its own district, by the number of steps indicated by the Character of the current round. All three are therefore always aligned. When a player decides to activate Golems (through a Work action or other effects), they can activate a neutral Golem as if it were one of their own, paying the **additional cost** indicated on the board extension, in the column where the Golem is located:

Columns I-II: 1 resource of your choice;

Columns III-IV: 2 identical resources of your choice;

Columns V-VI: 3 identical resources of your choice;

Column VII: 4 identical resources of your choice;

Columns VIII-IX-X: 5 identical resources of your choice.

Only 1 neutral Golem can be activated **per turn**. A neutral Golem acts like a normal Golem and can be used to activate the Neighborhood tile where it is located or a Mission card (either in the same column or any column behind it). Just like normal Golems, neutral Golems must be laid down when activated and placed back upright during the Movement phase. Neutral Golems cannot be killed.

Example: Jade (purple) performs a Work action and activates 3 Golems. She decides to activate 2 of her Golems and a neutral Golem. Since the latter is located in column IV, Jade must pay 2 identical resources.

Final Scoring

In addition to the Victory Points earned as usual, each player earns:

- 2 VP for each Mechanism token they have collected.
- 1 VP for each unused Gold piece left on their Mission board.

Note: Some Missions earn players additional Menorahs, which multiply their points.

Example: Jade (purple) earns 6 VP for the Mechanism tokens she has collected and 2 VP for the unused Gold pieces she has.

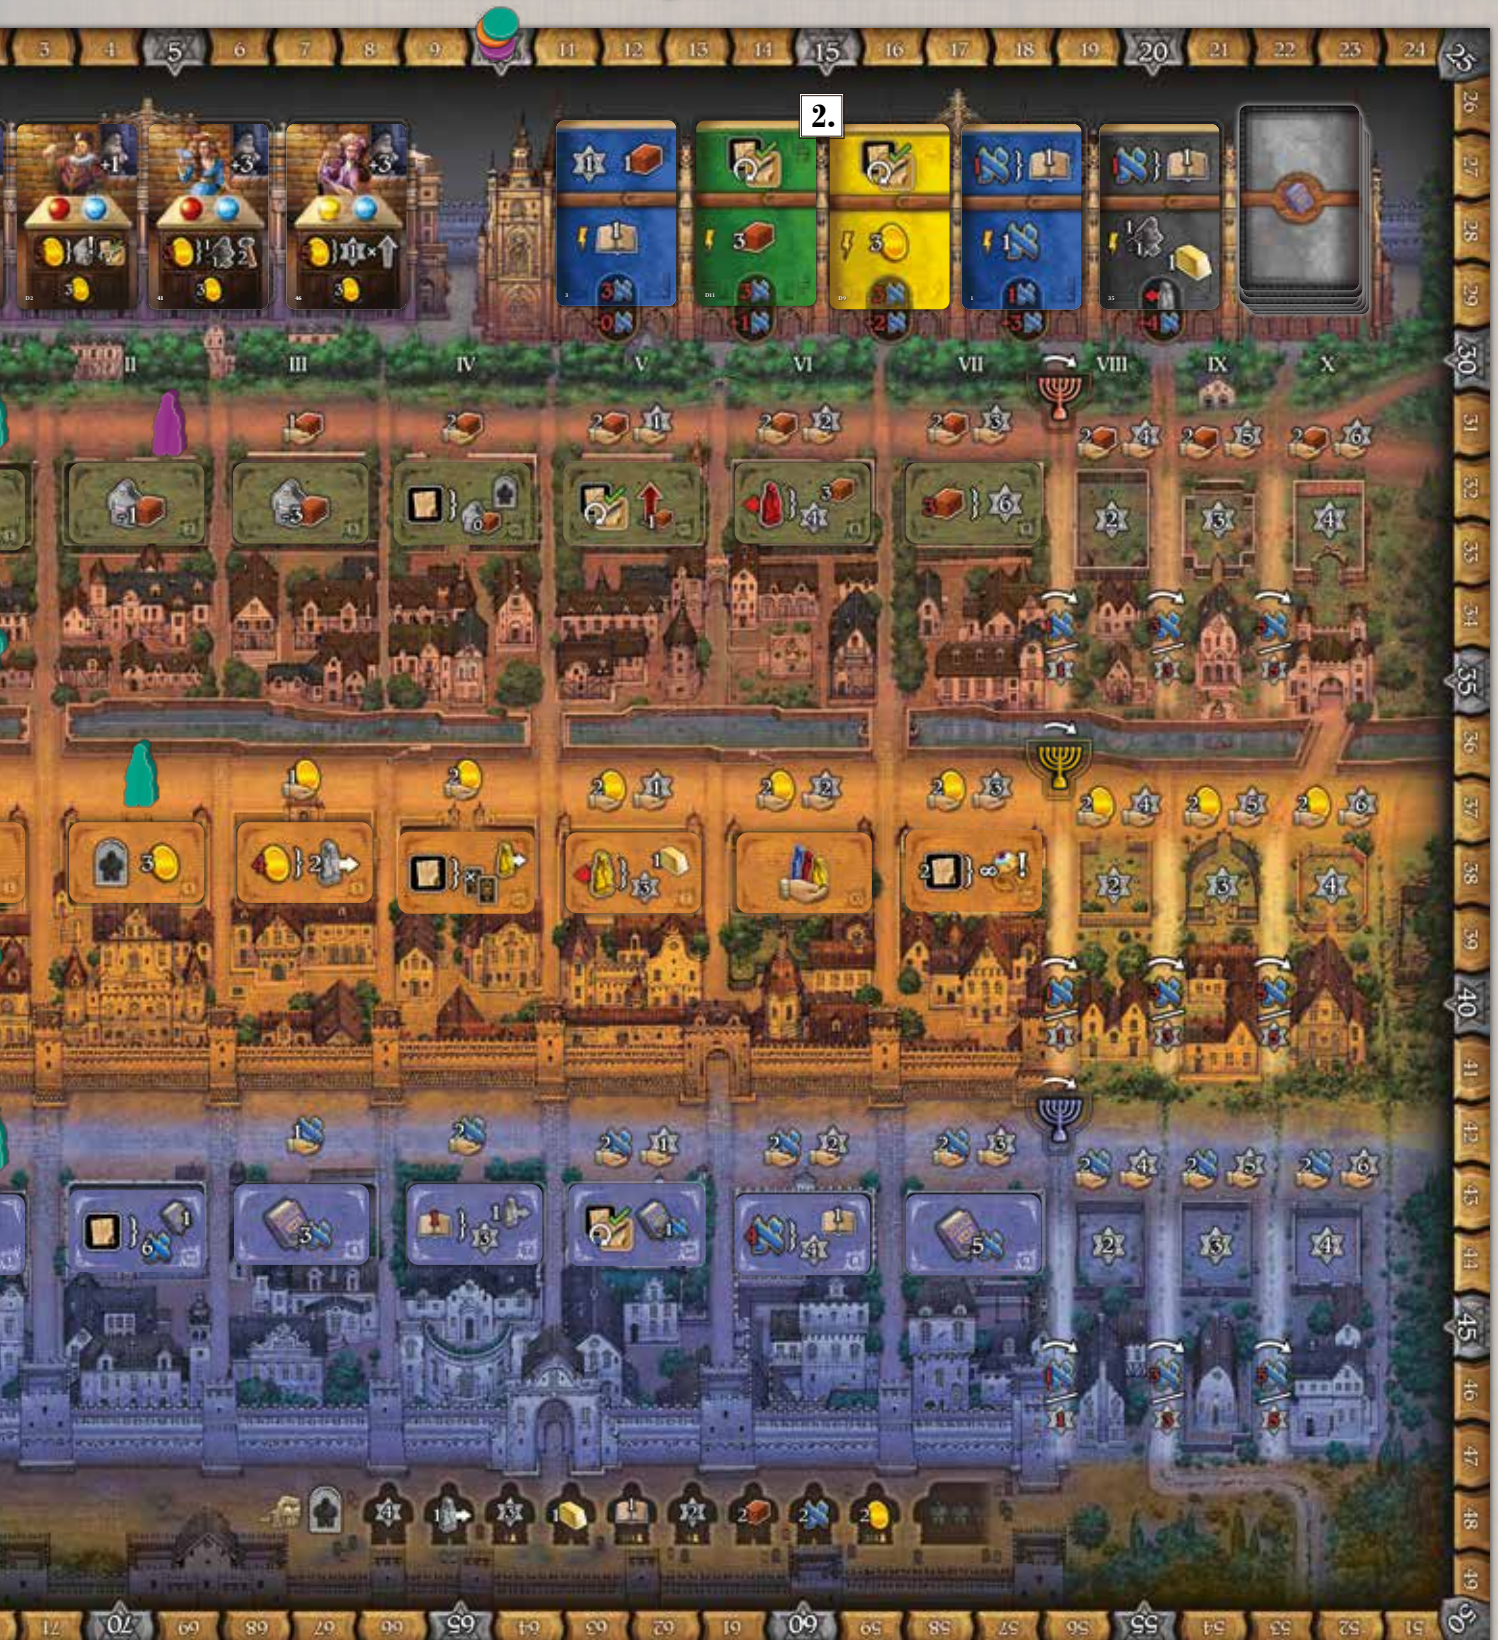

Deals Module

SETUP

Set up the game as in the base game, with the following additions and changes.

1. Shuffle the new **Character cards** into their respective decks before drawing the cards to be placed in the Palace on the board.
2. Shuffle the new **Book cards** into their respective deck before revealing the cards to be placed in the Library on the board.
3. Shuffle the new **Neighborhood tiles** into their respective stacks before drawing the 7 tiles to be placed on the board. If 2 tiles with the same number are drawn, the tile marked with the letter D must be placed after the other.
4. Place the **Debt tokens** face down in a common supply.
5. Sort the **Deal cards** according to their back and shuffle the three deck separately. Each player then draws 2 cards from each deck.
6. Each player takes a **Summary tile** to replace the Summary card of the base game.

PRELIMINARY DRAFT

Each player **chooses a Deal card** from their hand and keeps it aside, then **passes the remaining cards** to the player on their left. Repeat this process until each player has chosen 6 cards.

Afterwards, each player chooses a Deal card from their hand and **plays it** face up in front of them. They then draw a number of random **Debt tokens** from the supply based on the card's level (I=1, II=2, III=3) and keep them face up in front of you.

Finally, they the other Deal cards in your hand.

Example: Jade chooses the first Deal to keep (placing it face down in front of her), then passes the others to the player on her left while receiving 5 more cards from the player on her right. From these, she will choose another card to keep, and so on.

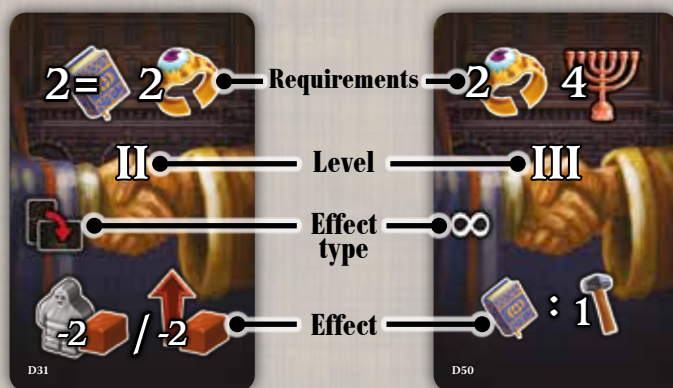

Example: Jade chooses to play this level II Deal, drawing 2 Debt tokens from the supply.

GAMEPLAY

Playing a Deal

If you meet the **requirements** of a Deal in your hand (listed at the top of the card), you may play that card. If you do so, you do not receive Debt tokens as you did at the beginning of the game.

When a Deal is played in front of you, it provides an effect that can be **permanent** or **once per round**. To activate a once-per-round effect, rotate the card by 90 degrees. At the end of the round, all players rotate their used Deal cards back to their original position.

Once per round effect

Permanent effect

Debts

You may receive additional Debts during the game as obligations from Neighborhood tiles, Book cards, or card/Character effects. Each time you receive a Debt, randomly draw one from the supply and place it face up in front of you.

Phase 8) Repaying Debts (on each round):

1. You can repay only 1 Debt during this phase by paying the cost indicated on the token. If you do so, turn the Debt token face down: it is no longer active. There are also other effects that allow you to repay Debts in other ways (see the Appendix).
2. Lose Victory Points based on how many Debt tokens you have not yet repaid (those that are still face up in front of you).

Penalties for unpaid Debts

1 Debt: -1 VP

2 Debts: -2 VP

From the 3rd Debt onwards: -2 VP each

1=1VP, 2=2VP, 3=4VP, 4=6VP, 5=8VP, 6=10VP, ...)

Example: Jade has two Debts to repay. She chooses to repay the one that requires 4 Clay: she returns the resources to the supply and turns the token face down on the light-colored side.

Example: At the end of the round, you have 3 unpaid Debts. You lose 4 VP that round.

Book cards

The new black Book cards force you to draw 1 Debt.

END OF THE GAME

At the end of the game, you lose additional Victory Points for any unpaid Debts left in the same way as in phase 8. In other words, in the last round, the penalty for unpaid Debts is doubled (once in phase 8 and then again at the end of the game).

Final score based on the number of Deals played:

If you played 3 or fewer deals, you get no additional points;

If you played 4 pacts, you get +2 VP;

If you played 5 pacts, you get +5 VP;

If you played 6+ pacts, you get +9 VP.

Example: During the final scoring, in addition to the VP earned as usual, Jade earns 2 VP for having played 4 Deals and loses 2 VP for having 2 unpaid Debts left.

CREDITS

Golem is inspired by a Jewish legend and, despite referring to some Jewish elements, it isn't meant to represent this tradition we all respect deeply. Special thanks go to David Piazza from the Rabbinate Centrale di Milano, expert in Jewish history and culture, who supervised all the decisions regarding icons, names, and setting and gave his blessing to this project.

SEALS APPENDIX

Mission Cards

	Get the bonus from the Character of the current round without paying any Coins (or having to meet their requirements).		Take two Books without paying any Knowledge.
	Activate all your completed Artifacts.		Activate the bonuses of all Books in a single column.
	Activate one of your Golems and get the bonus from that Neighborhood tile twice. Then, kill that Golem and place it in the rightmost Cemetery space (which gives no bonuses).		Get all the bonuses of a Book card in the Library (without taking that card).
	Kill a Golem and place it in the rightmost Cemetery space (which gives no bonuses). Get 8 Clay.		Draw 3 Book cards from the deck. Choose one and play it for free. Put the others at the bottom of the deck.
	Move a Golem wherever you want (within the same district) and activate it (it cannot be used to complete a Mission).		

DEALS APPENDIX

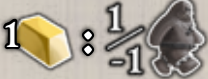

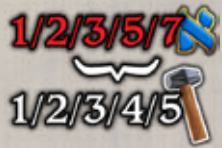

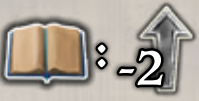

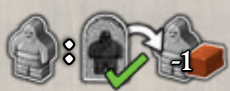

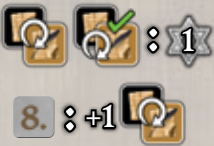

New Icons

	Take a random Debt token from the supply.		Repay a Debt paying the indicated cost		Repay a Debt for free (flip the token without paying the indicated cost).
--	---	--	--	--	---

			2 VP for each blue/yellow/red Menorah you have.
--	--	--	---

	Activate all your completed Artifacts.		2 VP for each Debt token you have repaid.
--	--	--	---

Deal Cards

	Every time you earn a Gold piece, you can move a Golem 1 step forward or backward.
	Pay 0 Coins (instead of 1) to perform a Mirror action. If you do so, you may also pay 1 Coin (instead of 3) to move your marker up the Study track by one space.
	Every time you move your marker up the Golem track, you earn 2 VP.
	When you perform the Work action, these are the new costs to activate Golems. As usual, subtract the value of the action from the cost. You may activate up to 5 Golems.
	Every time you take a white marble, get one resource of your choice and move a Golem 1 step forward or backward.
	Every time you kill a Golem, you can repay a Debt (paying its cost) and move a Golem 1 step forward or backward.
	When you meet a Character's requirements using one or more white marbles, you get a discount of 2 Coins to get their bonus. When you meet a Character's requirements without using white marbles, you get a discount of 3 Coins to get their bonus.
	Every time you take a Book, you can spend 1 Clay to earn 1 VP multiplied by the position of your leftmost Student.
	Every time you move up the Study track, you can upgrade one Development of your choice with a discount of 2 resources.
	Every time you create a Golem, you can retrieve a Golem from the cemetery to create it again with a discount of 1 Clay. Receive again the bonus of the cemetery space you have cleared.
	Every time you repay a Debt, either paying its cost or for free, you earn 1 VP. During phase 8, you can repay an additional Debt.

	Every time you create a Golem, you earn 1 VP for each red Menorah you have.
	You can meet the Character's requirements using a black marble.
	Every time you place the first Book in a new column, you earn 1 VP for each blue Menorah you have.
	Every time you take a yellow marble, you earn 1 Coin and 3 VP.
	Every time you take a red marble, you earn 1 Clay and 3 VP.
	Every time you take a blue marble, you earn 1 Knowledge and 3 VP.
	You can never go back on the Golem track. Double the income of the Golem track.
	Every time you repay one Debt, either paying its cost or for free, you earn 2 VP.
	Every time you complete an Artifact, you earn 1 VP for each yellow Menorah you have.
	Double the income of the blue Student.
	Double the income of the red Student.

	Double the income of the yellow Student.
	When you take the black marble, move all your Students 1 step forward. The black marble acts as a wild symbol to meet the Characters' requirements.
	When you meet a Character's requirements, you earn 4 additional VP (if you activate their effect). Otherwise, you earn 2 additional Coins.
	Every time you take a Book, you activate a Golem.
	During phase 8, you can repay 2 additional Debts. Otherwise, you earn 1 VP for each Debt you have repaid.
	Every time you move up the Study track, you can move one or more of your Golems a total of 3 steps forward or backward, or you can activate one Golem.
	Every time you earn Gold pieces, you also earn 1 Clay and 1 Knowledge, and you can move a Golem 1 step forward or backward.
	When you meet a Character's requirements, you can repay a Debt for free.
	Move a Golem 1 step forward or backward and activate a Golem.
